

# SeaBat 7125

## Mounting Bracket

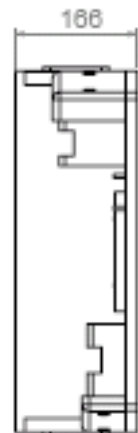

The SeaBat 7125 mounting bracket provides a robust and cost-effective mounting platform for single or dual frequency SeaBat 7125 systems. Constructed from non-corroding materials such as glassfibre the bracket provides secure mounting points for the receiver, two projectors and a SVP-70 sound velocity probe. A standard flange mount provides easy interface to either pole or permanent installations on a variety of vessels. The bracket is supplied assembled, with all hardware required for installations and a comprehensive installation manual.

Use this hole pattern for installation on a plane surface. Remove mounting ring first.

4 X M16 mounting holes for mounting on poles or similar.
