

# SeaBat 7125

## Mounting Bracket

The SeaBat 7125 mounting bracket provides a robust and cost-effective mounting platform for single or dual frequency SeaBat 7125 systems. Constructed from non-corroding materials such as glassfibre the bracket provides secure mounting points for the receiver, two projectors and a SVP-70 sound velocity probe. A standard flange mount provides easy interface to either pole or permanent installations on a variety of vessels. The bracket is supplied assembled, with all hardware required for installations and a comprehensive installation manual.
